

Research project: Conceptualisation of inclusion in education (KIBI)

Team: Simone Seitz (PI), Heidrun Demo (Co-PI), Rosa Bellacicco, Petra Auer

Duration: Nov 2020 bis October 2023

Funding: internal funding

Abstract

The project aims at a theoretical framework for the research projects of the competence centre.

Basic concepts and interrelationships will be developed and substantiated theoretically in order to create a basis for the various research projects in the Competence Centre. These focus on issues related to inclusive education at the different levels of the education system.

Due to the location and the international orientation of the competence centre, different cultural and linguistic discourses get linked.

Thus, a theoretical and methodological-conceptual basis for the research work in the competence centre will be created and processually expanded over the course of the findings from the various studies.
